

Winter is coming... *are you ready?*

Save time and money on snow & ice removal with

ICE-X

We use an environmentally safe liquid deicer that can be applied to just about any walking surface such as sidewalks, steps, bus stops, door tracks, and more, along with driving surfaces.

EFFECTIVE DE-ICER & ANTI-ICER: Can be sprayed on pavement before precipitation to prevent formation of ice and to create a barrier between the pavement and the falling snow/ice. This allows for easy mechanical removal of snow and ice by preventing the bonding of ice and snow packing to the surface. *Liquid products can be effectively sprayed as much as a week BEFORE a storm. Liquids go into the pores of the road and won't be thrown like sand and salt.*

PREVENTS SNOW AND ICE BUILD-UP: For the best results, apply to areas cleared of any existing snow or ice. Use periodic reapplication to prevent snow and ice from binding to the surface.

MELTS EXISTING SNOW, ICE AND FREEZING FROST: Effective deicer when applied to the surface of ice or snow pack.. This can help break up hard packed snow and ice to allow for easy mechanical removal.

Customers are responsible for any mechanical removal of snow and ice.

Services are provided under a seasonal contract.

Our product is a multi-component potassium acetate based liquid deicer and anti-icing agent.

Our product is non hazardous per OSHA requirements.

Our product is non toxic and less corrosive than chlorides.

Our product lasts longer than chloride-based blends.

Our product does NOT contain any non-volatile organics, rendering it safe for the atmosphere - no hazardous air pollutants to worry about.
